

GTECHNIQ
SMART SURFACE SCIENCE

WWW.GTECHNIQ.COM

Why Gtechniq?

If you want the best protection for your car, then look no further. Gtechniq bridges the gap between innovation and reality, engineering the world's best surface care products.

All Gtechniq products are based on science, innovative materials and ease of use. They have been designed to deliver maximum long-term visual impact, protecting against the elements and day-to-day use.

Gtechniq incorporates Smart Surface Science into every product it produces. By harnessing the performance of nano-scale composite materials and testing them to extremes, Smart Surface Science offers a guarantee that Gtechniq products work harder, smarter and more easily than anything else you have ever tried.

BRIEF HISTORY

Gtechniq was founded by quantum physicist Drew Gill in 2001, out of a total dissatisfaction with the performance of paint protection products at the time.

From this discontent came a simple idea, 'To engineer the world's most beautiful, perfectly finished, smartest and most intelligent surfaces. Surfaces that do much more than simply look great when new.'

Drew's background meant that he had a good understanding of how the forces, shapes, and structures of surfaces work on very small scales. He also knew what modifications may be possible to existing paint protection in order to add some really useful enhancements. Improvements such as dirt repellency, ease of washing, scratch, UV and stain resistance, along with, long-term gloss and colour stability.

So, after surveying many avenues of material science, in particular nano-scale surface engineering, lots of hard work, and many thousands of failures, Gtechniq, Smart Surface Science was born.

The first product in the Gtechniq range to be produced was C1 Crystal Lacquer, closely followed by P1 Nano Composite Polish.

In 2006, Rob Earle became Managing Director of Gtechniq Ltd, taking over the reins from Drew. Rob's passion for cars, boats and detailing in his spare time, gave him the enthusiasm to develop Gtechniq, testing new boundaries. He has innovated and developed the products Drew had created, plus a whole lot more besides.

PAINT PROTECTION APPLICATION - YOURSELF OR A MASTER DETAILER?

Gtechniq has a range of paint protection available from chemically bonding, long-term solutions, to those which can be used on a more regular basis.

If you are confident and have detailed a car before then you may be keen to apply Gtechniq's longer lasting products yourself. However, if you do not have any detailing experience, or want our best coating (Crystal Serum Ultra) applied, then we strongly recommend the use of one of our international accredited detailers. You can find your nearest detailer and can get an estimate for the work by visiting [service.gtechniq.com](https://www.service.gtechniq.com)

You will also find comprehensive advice, application instructions and how-to videos online.

HOW TO APPLY GTECHNIQ CHEMICALLY BONDING COATINGS

1. PERFECT

If required polish your paintwork to remove any Imperfections.

2. DE-GREASE

Spray Gtechniq Panel Wipe onto a MFI Microfibre Buff Cloth and then carefully wipe down your paintwork to remove all polish residues.

3. APPLY

Soak the application pad with 2 full measures from the pipette. Spread onto a small panel or 1/2 a large panel and immediately remove residue with a MFI cloth.

CRYSTAL SERUM ULTRA

PROFESSIONAL APPLICATION ONLY

FEATURES:

- Nine year guarantee when applied by a Gtechniq Accredited Detailer
- Matchless levels of gloss, surface slickness, swirl and chemical resistance
- A revolutionary new 7nm nanoparticle works alongside a 20nm nanoparticle, increasing the ration of crosslinkers - reinforcing the top layer of the coating
- The hard 10h top layer and flexible 7h base layer offer improved swirl resistance over regular 9h paint protection
- Can withstand even the strongest wash chemicals (pH2 - pH13) and bird droppings
- Hydrophobic and makes a car easy to maintain, but for the definitive hydrophobic function EXO Ultra Durable Hydrophobic Coating or C2 Liquid Crystal can be applied over the top
- Unaffected by extreme heat changes, even from -40° to +250°C

SIZES:  30ml  50ml

HOW IT WORKS:

CRYSTAL SERUM LIGHT

FEATURES:

- Best possible swirl mark and chemical resistance from a prosumer grade product
- High-gloss and slick-to-touch
- Makes cleaning your car a breeze
- Five year guarantee when applied by a Gtechniq Accredited Detailer
- Offers 80% of Crystal Serum Ultra's performance, but can be removed by machine polishing
- The high density ceramic layer is resistant to chemicals from pH2 - pH12 - makes bonded contaminants such as tree sap, tar, and hard water spots, easy to remove
- Resists temperatures as low as -40°C, to as high as +250°C

SIZES:  30ml  50ml

BENEFITS:

Serum Light forms an ultra-durable, high-gloss, slick-to-touch, chemically bonding inorganic layer of 9H optically clear ceramic. Once applied, glass levels will remain in the upper 90th percentile for significantly longer when compared to traditional paint protection products, and cleaning your car will be a breeze.

The high density ceramic layer is resistant to chemicals ranging from pH2 - pH12. This characteristic also makes bonded contaminants such as tree sap, tar, and hard water spots, easy to remove.

Unlike mainstream wax and organic polymer coatings, Serum Light can resist much higher and lower temperatures. They resist temperatures as low as -40° to as high as +250°C.

CRYSTAL LACQUER

FEATURES:

- Up to five years durability
- Five year guarantee when applied by a Gtechniq Accredited Detailer
- Easy to apply - ideal for those new to ceramic coatings application
- Best Gtechniq coating for matte finish cars
- Good level of gloss retention if paintwork is glossy
- Crystal-clear finish
- C1 forms a crystalline film which is extremely hard - this characteristic makes it effective at preventing minor scratching from poor wash technique on relatively soft automotive paint

SIZES:  30ml  50ml  250ml

6 months later

1 year later

EXO

ULTRA DURABLE HYDROPHOBIC COATING

FEATURES:

- 18-24 months durability
- Warm gloss look and slick finish
- Unparalleled water and dirt repellency
- Ensures your vehicles surface stays cleaner and glossier for much longer
- Straight forward, easy application process
- Major leap forward in Last Surface Protection Technology
- Hard film makes water spots easier to remove

SIZES:  30ml  50ml

HALO

FLEXIBLE FILM COATING

FEATURES:

- Lasts up to two years on Paint Protection Film (PPF) and vinyl
- Makes surface easier to maintain
- Can be used on gloss, satin and matte finishes
- Proven to work on self-healing films
- Enhances the performance of PPF and vinyl
- A chemically bonding, ultra-dense flexible film that becomes the permanent surface of the film - protecting it from the elements a car faces on a daily basis
- The density of the coating and its low surface energy improve dirt and water repellency
- Helps to prevent staining from dirt ingestion
- Reduces yellowing caused by UV rays

SIZES:  30ml  50ml

Co

AERO COAT

FEATURES:

- Specifically formulated to minimise adhesion of foreign objects on race cars
- Can be used on road cars with a lifespan of up to two years
- Good hydrophobicity, some swirl resistance
- Can be applied to paint or gel coat
- Use as a standalone product or over a Gtechniq ceramic coating

SIZES:  30ml  50ml

C4

TRIM PROTECTION

PERMANENT TRIM RESTORER

FEATURES:

- Up to two years durability
- Restores trim to 'as new' condition
- For use on all exterior trim
- Does not add an unattractive gloss finish
- Ideal for new trim, helping to prevent fading

SIZES:  15ml  30ml

C5 WHEEL PROTECTION

WHEEL ARMOUR

FEATURES:

- Up to two years durability
- Repels brake dust making your rims very easy to keep clean
- Suitable for wheels, callipers and exhaust tips
- Ideal for standard or alloy wheels
- Excellent stain and contaminant resistance

SIZES:  15ml  30ml

G1 GLASS PROTECTION

CLEARVISION SMART GLASS

FEATURES:

- Lasts up to 20,000 miles
- Improves wet weather visibility, helping to improve safety and eye strain
- Makes ice, bugs, tree sap etc. much easier to remove
- A strong chemical bond gives G1 unrivalled durability
- Low smear characteristics make it ideal for car windscreens
- G1 will only work on glass substrates
- Includes G2 Residue Remover

SIZES:  15ml  100ml

MATTE DASH AB

**FAST
RESULTS**

**EASY
CLEAN**

**ANTI
BACTERIAL**

FEATURES:

- Designed to protect dashboard and door card materials including vinyl, plastics and rubberised finishes
- Adds abrasion resistance
- Makes treated surfaces dirt, water, static and UV repellent
- With added BioCote® antimicrobial technology, treated surfaces will kill 99.9% of bacteria

SIZES:  100ml

SMART FABRIC AB

MAX
REPEL

EASY
CLEAN

ANTI
BACTERIAL

FEATURES:

- Protects all fabrics from water-based stains
- Breathable and extremely durable
- With added BioCote® anti-microbial technology, treated surfaces will kill 99.9% of bacteria, and repel mould and mildew
- Makes ordinary fabrics waterproof and easy to clean
- For use inside the car on seats and carpets
- Lasts up to 12 months depended on how 'high-use' the protected area is
- Non antibacterial version available for use on cabriolet roofs

SIZES:  250ml  500ml  1l  5l

LEATHER GUARD AB

FEATURES:

- Three to 12 months durability
- Forms a durable, abrasion-resistant barrier
- Matte finish
- Protects leather from UV rays, dye transfer and other discolouration
- With added BioCote® antimicrobial technology, treated surfaces will kill 99.9% of bacteria
- Ideal for seats, steering wheels, and high-wear leather areas

SIZES:  100ml  500ml

FEATURES:

- Removes all polish residues and leaves a 100% decontaminated surface
- Promotes bonding for all durable, chemically bonding coatings such as Crystal Serum Light, EXO and C5 Wheel Armour
- Contains no fragrances or colours - simply a pure blend of alcohols and solvents

SIZES:  250ml  500ml  5l

G

WASH

FEATURES:

- Designed to work in harmony with the Gtechniq range of coatings
- Excellent lubrication
- 100% biodegradable
- Produces a high foam content which breaks the bond the dirt film and your vehicles paintwork
- Lubricated dirt particles, minimising surface abrasion, maximising gloss retention

SIZES:  250ml  500ml  1l  5l

W2

UNIVERSAL CLEANER CONCENTRATE

FEATURES:

- Matchless cleaning power
- Can be used on any surface from fabric to engine bays
- Removes stains with ease such as biro marks, heel marks and food stains
- Can be used neat on the most stubborn stains if necessary

SIZES:  100ml  500ml  5l

W4

CITRUS FOAM

FEATURES:

- Non-caustic formula
- 100% biodegradable
- An effective citrus degreaser, combined with foaming agent, makes it tough on road grime and bug spatter, without damaging your coating

SIZES:

1l

5l

W5

CITRUS ALL PURPOSE CLEANER

FEATURES:

- Removes oil and grime with ease
- 100% biodegradable and pH neutral
- Various cleaning roles from engine bay degreasing, to carpet stain removal
- Can be used neat for hard-to-shift grime and up to 10:1 for less soiled areas

SIZES:

500ml

5l

W6

IRON AND GENERAL FALLOUT REMOVER

FEATURES:

- Dissolves fallout and brake dust fast
- Safe, yet effective
- Contains a corrosion inhibitor and is designed to combat the effects of acid rain
- Thick gel-like formula ensures it will cling to vertical surfaces, degreasing them

SIZES:  250ml  500ml  5l

W7

TAR AND GLUE REMOVER

FEATURES:

- Removes tar and glue with ease
- Full strength, solvent-based
- Just as good on a protected car as one that is unprotected

SIZES:  500ml

W8

BUG REMOVER

FEATURES:

- Removes bug splatter with ease
- 100% biodegradable
- pH neutral

SIZES:  250ml  500ml  5l

W9

WATER SPOT REMOVER

FEATURES:

- A concentrated formula, with three mechanism approach - dissolves and removes salts, traps metal ions, and removes silica scale
- Hard water spots will remove from the surface with ease
- Works well on all paint types and glass

SIZES:  250ml  500ml

QD

QUICK DETAILER

FEATURES:

- Easy spray-on, wipe-off formula
- Use to buff away water marks, or finger prints, light dusting, or smears left behind after washing
- Can be used on bodywork, plastic and wheels
- Layer the product to boost gloss, slickness and durability

SIZES:  250ml  500ml  5l

I2

TRI-CLEAN

FEATURES:

- Kills 99.9% of bacteria - ensures surfaces remain hygienic and fresh, by actively reducing the number of microbes
- Powerful pH neutral cleaner
- Can be used on all interior surfaces
- Contains a true odour absorber, not an odour mask, which eliminates tacky residues that attract dirt

SIZES:  500ml  5l

G4

NANOTECH GLASS POLISH

FEATURES:

- Water-based cleaner for glass
- Contains nano abrasives and citric acid which achieve a smear and scratch-free finish every time
- High-performance polish that cuts through dirt and grime
- Leaves a clinically clean finish
- Recommended for use before application of G1 ClearVision Smart Glass or G5 Water Repellent Coating for Glass and Perspex

SIZES:  100ml

G6

PERFECT GLASS

FEATURES:

- High-performance, powerful cleaning product
- Zero smear, pure formula
- Anti-static effect helps to repel dust

SIZES:  500ml  5l

Pi

NANO COMPOSITE POLISH

FEATURES:

- One product does the work of three - no need for a cutting, medium, and finishing compound
- With many more active particles working the surface, the polish works faster with less effort
- Virtually no lubricant means there is no 'drop back'
- Does not use fillers and produces a durable, true finish
- Can be used by hand to remove light swirls and oxidation, or with a machine polisher to safely remove up to 1500 grit wet sand scratches

SIZES:  100ml  500ml  1l  5L

m1

ALL METAL POLISH

FEATURES:

- Formulated to produce an optically clear finish on metal
- Will not burn or scratch the surface
- Use on any type of metal
- Ideal for use on exhaust tips, metal grills and metal trim

SIZES:  100ml

ACCESSORIES**

WM₂ MF₁ MF₂ MF₄ MF₅

MF₆ AP₁ AP₂ AP₃

WM₂

MICROFIBRE WASH MITT

FEATURES:

- Ultra-low friction glide characteristics minimise swirl marks
- Designed to hold maximum volume of wash suds
- 100% split varied length polyester strands are optimum for contaminant release

SIZE EXCLUDING CUFF:

18x22cm

MF₁

ZeroR MICROFIBRE BUFF CLOTH

FEATURES:

- Ultra soft and very effective for removing residues from delicate, high-gloss surfaces
- High polyamide content (30% vs as little as 10% for standard cloths) and the ultra-split nature of the fibres, make the MF1 exceptionally efficient and significantly softer than other cloths on the market

SIZE: 40x40cm

MF₂

ZERO SCRATCH MICROFIBRE DRYING TOWEL

FEATURES:

- Helps to minimise marring
- Designed to be as kind to paint as possible, and at the same time absorb enough water to dry even the largest car

SIZE: 60x90cm

Outer membranes are made from highest quality ultra soft microfibre which has been engineered to wick water quickly from the surface into the core

Inner ultra absorbent microfibre water reservoir draws water through outer membranes locking it away to ensure maximum drying effect

MF₄

DIAMOND SANDWICH DRYING TOWEL

FEATURES:

- Dries to a streak-free finish
- Ultra-soft highly absorbent outer layer wicks water into core reservoir
- Unlike standard drying towels, an MF4 can be easily wringed out

SIZE: 60x60cm

MF₅

POWER GLASS CLOTH

FEATURES:

- Ideal for cleaning all glass
- Fishscale weave for powerful cleaning action, removing even microscopic grime from the surface of windows
- For use with G6 Perfect Glass for a guaranteed crystal-clear finish

SIZE: 40x40cm

MF₆

HAZE BUSTER

FEATURES:

- Specialised, high-quality cloth designed to remove hazing that can occur on the final buff of thicker Gtechniq coatings
- Closed loop design makes removing residue more effective than with warp knit cloths

SIZE: 40x40cm

AP₁

LINT FREE APPLICATOR PAD (X10)

FEATURES:

- 100% cotton
- Great for an even finish
- Ideal for Gtechniq coatings

AP₂

ULTRA SOFT FOAM FILLED MICROFIBRE APPLICATOR

FEATURES:

- Ultra-soft microfibre, foam-filled
- The ultimate applicator for applying Gtechniq coatings
- Covered in a dense microfibre cloth, with a handy finger slot, you can apply coatings safer and faster

SIZE: 8cm in diameter and 1cm thick

AP₃

DUAL LAYERED SOFT FOAM APPLICATOR

FEATURES:

- Washable
- Ideal for thicker coatings and polishes such as L1 Leather Guard AB, T1 Tyre and Trim and G4 Nanotech Glass Polish

SIZE: 10cm diameter

KIT BAGS

FEATURES:

- Handy storage
- Carry handle
- Eye-catching in Gtechniq red, these bags feature the Gtechniq Smart Surface Science logo
- The padded, waterproof inner lining will ensure products remain protected whether the bag is in the boot, or on a shelf in the garage
- Large kit bag suitable for storing 5x 250ml products and 4x 500ml and has a handy front pocket for cleaning cloths

SIZE: 18x18x18cm or 30x24x11cm

GSPRAY BOTTLE

FEATURES:

- Holds 750ml of fluid
- Graduated bottle
- Heavy duty spray head
- A high volume pump makes it ideal for decanting and mixing Gtechniq products ready for application

HOW TO WASH YOUR CAR THE GTECHNIQ WAY

TOP TIP:

Try to wash your car in the shade, this will prevent soap suds from drying prematurely before you have a chance to rinse them off. When this is not possible, soap suds should be rinsed panel by panel. Rinse with an open-ended hose, this allows the water to sheet, making drying an easier task

STEP 1

If your rims and wheel arches are very dirty and, or, caked with brake dust, spray W6 Iron and General Fallout Remover onto your car's wheels, and a neat solution of W5 Citrus All Purpose Cleaner into your wheel arches. If your rims are not very dirty, skip forward to STEP 3

STEP 2

Leave the W5 and W6 to dwell for three to five minutes. During this time any ferrous particles will dissolve into the W6 solution turning it bright purple

STEP 3

Hose or jet wash your wheels and wheel arch liners to remove as much loose dirt, and if you have completed STEPS 1 and 2, the W5 and W6 residues. If your rims and arches are still coated with dirt and, or, brake dust, reapply the W5 and W6 and agitate the dirty areas with the appropriate brushes. Namely a soft detail brush for wheel nuts, a soft wheel brush for rims and a long handled wheel arch brush for your wheel arches. And then rinse with a hose or jet wash

STEP 4

NOTE

Throughout the wash process, make sure you use plenty of soap suds on your mitt and rinse it thoroughly. Keep an eye on the water becoming too dirty, and replace both buckets as and when necessary

Fill one bucket of water with GWash solution, and another with fresh water - use grit guards in the bottom, if you have them, to prevent larger dirt particles mixing in the water. Dunk the WM2 Microfibre Wash Mitt into the suds, wash a wheel and arch at a time. Rinse the wash mitt in the clean water bucket to release the dirt, before dipping it into the soapy bucket again and starting the next wheel and arch

STEP
5

Apply a thick layer of W4 Citrus Foam all over your cool, dry car using a foam lance. If you do not have a foam lance then dilute - as much as 1:5 depending on how dirty your car is - and spray W5 Citrus All Purpose Cleaner instead

STEP
6

Once applied leave the W4 or W5 to dwell on the car for up to five minutes and rinse the foam from the car at a relatively high pressure

STEP
7

If the lower sides are still dirty after they have been snow foamed, spray the area with a 1:5 dilution of W5 Citrus All Purpose Cleaner, leave to dwell for one to two minutes, and rinse with clean water

STEP
8

If the leading edges of your vehicle are peppered with bugs, spray W8 Bug Remover onto the contaminated areas, leave to dwell for three to five minutes and rinse away with water

NOTE

W6, W7 and W8 can be used as many times as required prior to washing. In extreme cases you may want to use a MF1 ZeroR Microfibre Buff Cloth to agitate the surface

STEP
9

If you have not done STEPS 5 through to 8, hose or jet wash your car to remove any loose dirt. Next, fill one bucket of water with a fresh GWash solution, and another with fresh water - use grit guards in the bottom, if you have them, to prevent large dirt particles mixing in the water. Dunk a fresh WM2 Microfibre Wash Mitt into the shampoo, gently wash a panel and then rinse it in the clean water. Repeat as you go around the car

NOTE

Always begin washing the paintwork on the upper surfaces - roof, bonnet and boot, and work your way down. Wash following the lines of the car, using a back and forth, or side to side motion. Circular motions when washing will pronounce any swirl marks

STEP
10

After washing, if there are any black spots, this is tar, Spray W7 Tar and Glue Remover directly onto the affected area, avoid getting the W7 on any of your vehicle's trim, vinyl, number plates or rubber parts. Allow W7 to dwell one to two minutes before gently wiping with a microfibre cloth, and then rinse

STEP
11

Rinse your car well all over with fresh water from an open ended hose or jet wash to remove all soap residues

STEP
12

Dry all of the exterior surfaces of your car with an MF2 Microfibre Drying Towel, or a MF4 Diamond Sandwich Microfibre Drying Towel. Simply lay the drying cloth across the surface and pull it towards you. Do not leave your car to dry naturally as this will leave water spots

NOTE

Never use a real leather chamois for drying as they are too harsh for modern paints and can scratch the surface

STEP 13

Clean all of the exterior glass with G6 Perfect Glass for a streak-free finish

STEP 14

Use Gtechniq Quick Detailer on your paintwork with a MF1 ZeroR MicroFibre Buff Cloth for a streak and spot-free finish

STEP 15

Once you have dried the wheels and tyres, apply T1 Tyre and Trim, or T2 Tyre Dressing, to the tyres with an AP3 Foam Filled Applicator for a slick finish

AND YOU'RE DONE!
